

Energy Policy

In line with the environmental policy, energy policy aims at the sustainability of resources for future generations. The energy-related aspects, which are reflected in environmental management, however, are only the foundation on which the energy management is built. The continuous monitoring and the detailed collection of data shall help to identify inefficient energy consumers and considerably reduce the consumption of the entire company.

Murdotec commits itself to set value on energy efficiency when investing in new equipment and also to investigate significant investments in this regard. Additionally, the costs of existing machinery and equipment are examined in the same way. The aim shall not be the simple exchange of used machinery by new ones but a reduction of machinery costs in the context of a reasonable amortization time. The reduced costs and the higher expected profitability shall help to strengthen the market long-term success.

CERTIFICATE

This is to certify that

Murdotec
Kunststoffe

Murdotec Kunststoffe GmbH & Co. KG

Heßlingsweg 8 und 30a
44309 Dortmund
Germany

has implemented and maintains an **Energy Management System**.

Scope:

Development, production, processing and distribution of thermoplastic materials

Through an audit, documented in a report, it was verified that the management system fulfills the requirements of the following standard:

ISO 50001 : 2011

Certificate registration no.	500944 EMSt
Valid from	2016-10-11
Valid until	2019-10-10
Date of certification	2016-07-11

DQS GmbH
