

Manufacturer's Declaration

SVHC

Murdotec produces "products" (semi-finished goods). Therefore, we are obligated to inform our customers according to article 33 of the REACH-regulation, in case the delivered goods contain substances of very high concern (SVHC) with a concentration of >0.1 % by weight.

At this point of time the list of SVHC comprises of 242 different substances and can be found on the websites of the European Chemicals Agency (ECHA):

http://echa.europa.eu/chem_data/candidate_list_table_en.asp

In our own interest and due to high delivery and product safety we take this matter seriously. We comply with article 33 of the REACH-regulation by following the below mentioned procedure:

We are always in contact with suppliers of relevant raw materials which incorporate in our products. We require a binding document which informs us if there are any raw materials with a SVHC concentration of more than 0.1 %.

EU-suppliers which deliver products used in magnificent volumes for producing our goods are liable to inform us – without being asked and without any delay – in case there are any SVHC substances with a concentration of >0.1 % in the delivered goods. In case we receive that kind of information from our suppliers what means that we are unable to keep the limit of a SVHC concentration <0.1 %, we will inform you immediately.

From today's point of view and considering the current information from our suppliers it's not to be expected that the concentration of SVHC substances in our products will exceed the limit of >0.1 %.
